

BUILDING FOR THE FUTURE

**FULL SERVICE UPSTREAM/MIDSTREAM OILFIELD
CONSTRUCTION ACROSS WESTERN CANADA.**

- Processing Facility and Above Grade Piping Construction
- Pipeline Construction
- Facility Maintenance and Capital Construction
- Pipeline Integrity, Maintenance, and Remediation
- 3D Scanning, Modelling, and Design

YOUR FULL-SERVICE CONTRACTOR OF CHOICE

Headquartered in Fort St. John, BC, SureLine Projects Inc offers a full range of premium mid and upstream oilfield construction services at any scale for Canadian clients. Powered by a culture of excellence, a proven history of delivering top-quality results, and the belief that long-term relationships are the best relationships, **we are trusted to deliver no matter what – from local partners to multinationals.**

SAFETY ACCREDITATIONS	MANAGEMENT COMBINED YEARS OF EXPERIENCE
ABSA, ISN, Technical Safety BC, COR, ComplyWorks, CWB	100+

AREAS OF OPERATION	SCALE OF OPERATIONS
Western Canada	\$10K- \$100M

OUR APPROACH

Key to our success is our approach. We are focused on reliably delivering best-in-class solutions without ever compromising our core values of integrity, loyalty, and community. **In other words: we say what we mean, and we do what we say.**

Safety, quality, and environmental responsibility are top priorities at every level. Our programs are built on 50+ years of development, testing, and success, which allows us to excel in the following ways:

SAFETY

We firmly believe we can avoid all occupational injuries and illnesses with the right training and application. Our crews are trained to recognize and mitigate hazards proactively, with an obligation to outright refuse unsafe work.

QUALITY

Our 'Plan, Do, Check, Act' process guarantees consistent quality assurance and robust quality control across all areas of work.

ENVIRONMENTAL STEWARDSHIP

We employ a systems approach to sustainable and green building that accounts for environmental considerations and energy efficiency throughout a project's entire life cycle – not just while we're working on it.

OUR CAPABILITIES

3D SCANNING TECHNOLOGY

- Point Cloud Visualization: Leica RTC 360 3D Scanner accurately captures data during pre-planning, granting complete project oversight via point cloud visualization.
- Virtual Construction-Assisted Workflows: Leveraging advanced software to optimize design times and functionalities.
- Surveying and Construction: Sokkia IX-605 total station allows one operator to perform combined function theodolite angle surveying and distance measurement.
- GPS Satellite Positioning: Topcon GPS base and rover unlocks extremely accurate measurements and cost estimations via satellite trilateration.

PIPELINE INTEGRITY, MAINTENANCE, AND REMEDIATION

- Ongoing support for any life-cycle phase
- Pipeline pigging, ILI support, integrity digs, coating inspection/repairs, suspensions, abandonments, line break repairs and remediation, line replacements, decommissioning, clock spring and compressions sleeve repairs, hot tap and stopple installation, internal liner testing/removal/replacement, soil stabilization, revegetation, and more.

FACILITY MAINTENANCE AND CAPITAL CONSTRUCTION

- All phases
- Existing facilities modifications, repair, and maintenance
- Project scoping/design, virtual construction-assisted workflows, 3D scanning and modelling, integrity and abandonment, construction management, and more.

PROCESSING FACILITY AND ABOVE GRADE PIPING CONSTRUCTION

- All phases + all disciplines
- Site construction, virtual construction-assisted workflows, foundations, piping/structural fabrication, complete project management/project controls, and hydro testing.

PIPELINE CONSTRUCTION

- All phases
- 2"-30"
- Clearing/salvage, 3D scanning and modelling, soil removal, pipe hauling/stringing/bending/gauging /welding/coating, excavation, installation, shading and backfill, hydro-testing, full package quality control, pre-build scouting through commissioning and everything in between.

THE SURELINE PROMISE

Decades of combined industry experience. Outstanding operational and strategic expertise. 100% locally owned, with a mind on maximizing Indigenous participation, returning profits to the local economy, and always working toward a goal of developing long-term partnerships.

That's the SureLine Promise: our vow to you that we will deliver a fully-optimized solution you can depend on.

Get in touch today, and let's start building for the future – together.
